After Finding an audio
Cassette, I Cleaned/
Restored it, and played
it in my tape
deck. The tape is
labeled "Swiss-Hit-Kassette"
and seemingly Feat-
-ures Classical music
on Side A, and Side B
Has not been investip-
-ated yet due to
malfunctions with the
Playback device. The
Tape Was ~~seen~~ seemingly
recorded in the ~~mid-70s~~
Mid-70s to the late-80s,

as signified by the use
of Flathead Screws
rather than Phillips.

The tape will be digiti-
-tised when the appro-
-priate equipment is
available. Until then,
this tape will be stored
in my media library,
alongside various other
media.
